

Home Conditions - Assessment Tool

What does it do?

This is a short assessment of the home conditions and their impact on the children who live there. It considers 20 aspects of home conditions such as odour, cleanliness and home maintenance. It concludes with a decision about the level of concern, what actions need to be taken, what tasks need to be done and who needs to do them.

How do I use it?

The scale is scored from 0 - 3 for each item and includes an area to make notes or record evidence. Mark the description that best represents the conditions in the home and their impact on the child. If there are different age children, complete the assessment in relation to the most vulnerable child. For example, the impact will be greater depending on the age and ability of the child (e.g. a badly soiled floor will have a different impact on a child who is crawling compared to an older child). Particular home conditions may prompt task (e.g. clearing of rubbish from home) and a subsequent review would establish whether there has been any improvement.

It is best completed in the home in partnership with the family, but could be done in the office.

The Graded Care Profile is another assessment tool that can be used to assess neglect. It includes home conditions but also includes other areas to provide a more comprehensive assessment.

Please confirm whether the Home Conditions were assessed as part of an announced or unannounced visit	Announced	<input type="checkbox"/>
	Unannounced	<input type="checkbox"/>

Please confirm whether the Home Conditions was undertaken jointly with the parent (or family/carers etc.).	With family	<input type="checkbox"/>
	Without family	<input type="checkbox"/>

Guidance: *The Home Conditions assessment is best completed jointly with the parents. This creates greater openness and a common understanding of the areas that may cause concern. Improvement can be tracked over time, giving families a clear record of their progress. Please consider each of the 20 factors listed and select the statement that best describes the home conditions. You should record brief notes about why you've chosen that option. You may wish to flag the factor for immediate attention. This will help to prioritise any follow up actions that are required. If there is more than one child in the family, it is best to complete the assessment in relation to the child on which the home conditions affect the most.*
