

Preventing institutional “secondary victimization”

by the Provincial Health Services Agency

Trento experience

GOALS

Reducing or avoiding the risk for abused children and their families in the care of the protection system to be subjected to a sort of “secondary victimization”

September,
Fresco Cycle, Trento

BACK AND
FORTH

METHODOLOGY

A small sized working group formed by protection system workers and psychologists; assuring professionals are properly educated and have a sustainable workload

OUTCOMES

The drafting of a best practice protocol for the shared management of the cases regarding the protection between the protection system and the psychology unit

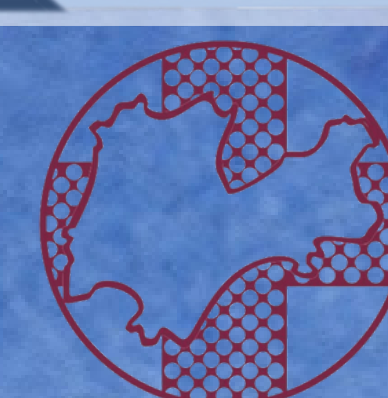

CONCLUSIONS

Implementing procedures which clearly show what to do and who's responsible for that; the presentation of the protocol within the whole territory of the Province of Trento

Buonconsiglio
Castle,
Trento

Authors: Maria Montanaro, Sabina Grigolli
